DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Wayman.

Wayman discloses an apparatus and method for forming an image comprising the steps providing a developing bias having a DC component 102 and an AC component 103 (Fig. 8) superposed on one another (Col. 7, lines 63-65); and applying the development bias to a developer carrying member 40; wherein the AC component is provided by superposing a waveform at a second frequency on a waveform at a first frequency in synchronism with each other (Col. 8, lines 1-8); and wherein the second frequency is an odd multiple of the first frequency (i.e. 3, Col. 8, lines 33-35).

Allowable Subject Matter

3. Claims 2, 3, 5, and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record teaches the potential for forming an electric field in a separating direction of a developer is maintained relative to a potential at an image
